

Chrome Products &
Castings For Classic Cars.
40th Anniversary Catalogue

Celebrating 40 Years of Innovation & Excellence

Established Since 1981

Welcome to the Ashwater Classic Car Parts Catalogue No. 14.

Ashwater is a British manufacturer and has been producing components for classic cars for 40 years. Using its own unique tool making system, the art of making flawless castings; polished and plated has been perfected by Ashwater in that period.

Original cast items will deteriorate at an accelerated rate once the original plating has been compromised, this problem is exaggerated in original pressure die cast parts as the substrate is often porous, aggravating the problem further.

Ashwater castings are engineered to ensure porous free conditions, rendering a superior polished and plated item (chrome plating will serve to highlight defects not obscure them).

Ashwater supplies the UK classic car market and the company is well known in the UK, North America, Australasia and the rest of Europe.

Ashwater's current tool inventory exceeds 1400 different components in production with an average of 30 new tools completed each year. The products range from mascots to overriders and door handles to thermostat housings. If you cannot find what you are looking for please contact the company direct as we may still be able to help you.

Ashwater is best known for its range of components for classic Jaguars but also make components for most UK classics from Alvis to Wolseley. Some parts are made exclusively for clubs and dealers.

Please note that a limited range of products are held in finished stock. Ashwater is a manufacturer, not a wholesaler and lead times on items vary dependant on demand. All Ashwater products are finished to our own high standards and are definitely worth the wait.
